☐ Custom amount sent from TradingView

☒ Multiple entries

If option is enabled, it will allow multiple Long/Short entries.

☒ Exit All

If option is enabled, then one exit alert will exit all open positions for corresponding side. For example, 3 OPEN-LONG positions will be closed by one CLOSE-LONG alert.
Note: When option is disabled Take Profit and Stop Loss are required!

☐ Swing trade

This option will swing your position when signal in the opposite direction will be received.

It is highly recommended to use Take Profit and Stop Loss to minimize your losses and maximize bot performance.

☐ Reduce only (for exit)

Reduce-only orders will only reduce your overall position. They will never increase your overall position size or open a position in the opposite direction.
